

STOCK IN ERICA IS RISING DAILY.

WHEN YOU INVEST IN CLEAN ENERGY, YOU'RE INVESTING IN REAL JOBS AND REAL PEOPLE.

Meet Erica. She's an example of what happens when you invest in the American worker instead of Wall Street scams. You see, she earns a steady paycheck at Cobasys, a clean energy company, where she makes batteries for hybrid cars. Erica and thousands like her are not only providing for their families, they're helping to wean America off of its dangerous addiction to oil and reduce global warming pollution.

But we need more. Much more. To spur investment in the new energy economy our nation needs firm limits on carbon pollution that causes climate change. Ask Representative Rush to invest in the American worker. For more information on how investing in clean energy technology will create and protect thousands of American jobs, please go to GetWorking.org. Together we can Repower America.
